

An aerial photograph of the Green Island Hydroelectric Project. The image shows a large concrete dam structure across a wide river. To the left of the dam is a large, flat, paved area, likely a construction site or parking lot. To the right, there are several buildings, including a large white industrial building and a smaller red-roofed building. The river flows from the top right towards the bottom left. The sky is clear and blue.

Green Island Hydroelectric Project FERC Project No. 13 Relicensing and Expansion

- **\$98.5 million construction cost**
- **48 megawatts electrical capacity**
- **Start 2009**
- **Completion 2013**
- **2,000 construction jobs - project**
