

Understanding Heroin, Addiction and the Brain

This is a **MUST ATTEND** event for parents, families, students, the whole community.

It's no longer a matter of **IF** opiate or heroin addiction will touch someone you know, it's **WHEN**. Attend this event so you'll be prepared!

Special Guest speaker
MICHAEL NERNEY

This presentation will provide professionals and community members insight and knowledge about new drugs, "old" drugs in new packages, and current drug abuse trends among adolescents and young adults. New trends on the streets and in the schools include abuse of heroin, methamphetamine, prescription drugs, marijuana, and other substances.

7:20 pm Feature Presentation:
Michael Nerney

8:40 pm Chasing the Dragon Trailer:
Assistant United States Attorney Richard Southwick

8:50 pm There is Hope:
Eric Dyer

Learn the gender differences of various substances on the brain.

Hear the likelihood of risk-taking by age and gender.

Addiction is a brain disease based on multiple changes within the user's brain.

Treatment takes time; recovery is possible.
